

Video chat through Skype

How to video chat your loved ones

Skype is a video chat app that's available both on computers and mobile devices. The app is free, or you can upgrade for paid features. To video chat with loved ones, the free version will suffice.

After installing the program on your device, you'll need to sign up for a free account with your email. As part of this process, you will need to sign up with a Skype ID, or username. You'll then need to provide that ID to the person(s) you want to call, or ask them for theirs, so you can add one another as contacts and place calls.

How to start using Skype

1. Install **Skype** via the App Store or Play Store. Open the app after installed.
2. In the search box, type the name of the contact that that you want to call. Select the contact.
3. Tap on the video camera icon located in the upper right hand corner to send the video chat request.
